

Pencil Code User Meeting 2026

PCUM-26 · 21–25 September 2026 · University of Alicante

All times local (CEST, UTC+2)

	Monday 21 <i>getting started & GPUs</i> <i>collecting coding topics</i>		Tuesday 22 <i>community & development</i>	Wednesday 23 <i>chiral MHD & dynamos</i>	Thursday 24 <i>numerical dissipation & PINN</i>	Friday 25 <i>final talks & wrap-up</i>
09:30 – 10:15	Introductions 2 min per person		Steering Committee Report	Deepen	Simon	Alberto
10:15 – 11:00	Axel		Philippe	Clara	Jorge	Ramkishor <i>online</i>
11:00 – 11:30	Coffee		Coffee + group photo	Coffee	Coffee	Coffee
11:30 – 13:00	Tutorial: beginners Touko	Tutorial: admin Philippe	<i>Coding</i> Axel & Touko	<i>Coding</i> Storing large arrays	<i>Coding</i> Finding pencils	Brainstorming GR in the Pencil Code
13:00 – 14:30	LUNCH		LUNCH	LUNCH	LUNCH	FAREWELL LUNCH
14:30 – 15:30 <i>Wed/Thu to 15:15</i>	Tutorial: GPU Touko		EXCURSION	Simon	Vinay <i>online</i>	Concluding remarks + next year's agenda
15:30 – 16:15 <i>Wed/Thu from 15:15</i>	<i>Coding</i> GPU			<i>Coding</i> Symplectic solver	<i>Coding</i> Numerical dissipation	FREE TIME
16:15 – 16:45	Coffee			Coffee	Coffee	
16:45 – 17:30	Neco			<i>Coding</i> Subcycling	<i>Coding</i> Numerical dissipation	
<i>evening</i>	Welcome drinks informal				Conference dinner	

Talks

Axel – Pencil Code since 2025; admin tutorial (Mon)

Philippe – Recent topics in Pencil Code development

Alberto – *title TBC*

Touko – tutorials: beginners (Mon am), GPU (Mon pm)

Deepen – Chiral MHD in Pencil Code

Clara – Neutron star physics

Ramkishor (online) – Magnetogenesis from a pseudoscalar–gauge field interaction

Illa (online) – Document your code: let ReadTheDocs do the rest

Jorge – Hydrodynamics with physics-informed neural networks

Neco – the Pencil and Quokka codes for small-scale dynamos

Simon – Multiphysics coupling (Wed). Numerical dissipation in CFD codes (Thu)

Vinay (online) – Does the plasmoid-mediated reconnection rate depend on the magnetic Prandtl number?
